TK302 is a dual printer, and using the same firmware can work as both ATB or as a BTP device. AE2009 NATIVE proven firmware allows smooth integration in any software architecture without needing unnecessary driver or additional software layer. The TK302 printer is built with a powerful processor inside and is able to use the same firmware for both ATB and BTP functions, configurable by a simple set up.

IP, RS232 and USB interfaces ensure the easiest and most flexible integration in any airport.

LCD full display always providing full readability also under strong ambients light.

The strong auto cutter is built for lasting 7 years.

Other than the most common sensors it's equipped with the new VeriNotch mobile sensors able to detect the black mark or the transparent gap of any paper media.

The optional Triple Feeder allows to handle up to 3 different ATB media like "economy class", "first class" and "business class".

RFID option ensures tags encoding according to IATA specs.
